SENIOR ENGINEERING LEADER | TECH SYSTEMS | CLOUD MODERNIZATION | FINOPS | GENAI

Engineering and product leader with 20 years of global experience delivering **scalable tech platforms**, cloud transformation, Generative AI adoption, and enterprise system innovation. Proven success modernizing legacy applications with **complex tech stack**, managing \$162M+ AWS budgets (5% YoY savings), and leading 20+ engineering teams across finance, supply chain, and compliance domains. Directed cloud-native with IaC, CI/CD, and observability guardrails, while scaling AI/LLM programs that reduced manual effort by 25%+. Known for building inclusive, high-performing teams and delivering measurable outcomes in mission-critical systems. Open to Senior Engineering Leader, Associate Director, Director of Engineering, and AI Program Leadership roles.

- **Engineering leadership:** Delivered enterprise platforms in finance, logistics, and compliance; increased sprint velocity by 30% and reduced defects by 25%.
- **SDM scope:** Manages ~7-8 engineering teams across products; owned hiring, career development, architecture reviews, and unblock strategies aligned to business outcomes.
- **GenAI program delivery:** Cut manual effort by 25%+ and improved decision-making via Ada, AskGenie, SafeDrive; integrated LangChain and Hugging Face for safe, productive workflows.
- **Cloud & FinOps:** Managed a \$162M AWS budget; delivered 5% YoY cost savings through GDPR-compliant deployments (CloudFormation, Lambda, DynamoDB), rightsizing, and IaC guardrails.
- **Observability & throughput:** Improved operational throughput by 20% by scaling EagleEye (*a python lambda backend service*) and embedding telemetry (Prometheus, Datadog) for proactive diagnostics and global support
- **Supply chain platforms:** Reduced manual interventions and improved inventory accuracy by scaling Procurement Advisor (automated ordering, robotics, virtual count predictions; ML demand sensing).
- **Financial automation:** Directed the \$5.3B Naazir capital planning program; standardized workflows and governance, mentoring TPMs and engineering leads across parallel tracks.
- **Digital transformation:** Reduced time to market by 35% for Scholastic through modular architecture, automation, and CI/CD.
- **Manufacturing & marketing innovation:** Lowered downtime by 20% with AR/VR training and predictive diagnostics; boosted marketing ROI 2.5x, with +30% targeting precision and -12% churn via ML automation.

CAREER PROGRESSION

- Amazon India Development Centre, **Senior Technical Program Manager/ Principal Technical Program Manager**, Mar'22 – Present
- Deloitte Consulting India Pvt Ltd, Gurgaon, **Engineering Lead (Engineering Manager)**, Nov'15 – Mar'22
- Shell Infotech India Pvt Ltd (@Deloitte, Hyderabad), **Project Manager**, Mar'15 – Nov'15
- EMERIO (Malaysia) SDN BHD, Malaysia, **Project Manager**, August'14 – Feb'15
- Royal Bank of Scotland Group, Gurgaon, **Team Lead (Specialism)**, Jul'09 – Jul '14
- Cincom Systems India Pvt. Ltd., Gurgaon, **Senior Member Technical Staff**, Dec'07 – Jun'09
- Kale Consultants Ltd., NOIDA, **Senior Programmer Analyst**, Nov'05 – Dec'07

CORE COMPETENCIES & TOOLS

Cloud: AWS, Azure, GCP | **AI/ML:** Python, TensorFlow, GenAI, LLMs | **DevOps:** CI/CD, IaC, Containers, Kubernetes

Program Delivery: OKRs, Agile, Scrum, PRINCE2, PMP, ITIL v3 | **Data:** BigQuery, Data Lakes, Governance, Security & Privacy

EDUCATION & CERTIFICATIONS

- **Master of Science in Information Technology**, Karnataka State University, Mysore
- **Bachelor of Science in Information Technology**, Karnataka State University, Mysore
- **GNIIT Diploma**, NIIT, Delhi

CERTIFICATIONS

- **Project Management Professional (PMP)** – March 2025
- **AWS Certified Solutions Architect – Associate** – June 2024
- **AWS Certified Cloud Practitioner** – June 2024
- **PRINCE2 Practitioner**, AXELOS, UK
- **ITIL v3 Foundation**, APMG International, UK

Appendices

Appendix A – Amazon India Development Centre

Amazon India Development Centre, **Senior Technical Program Manager/ SDM**, Mar'22 – Present

Key Achievements

- Led GDPR-compliant digital transformation and **AWS Cloud Infrastructure** deployment using **CloudFormation**, managing a **\$162M AWS cloud budget** and reducing costs by **5% annually** through cloud usage optimization and IaC best practices.
- **Led development and scaling EagleEye**, Amazon's internal shipment troubleshooting tool, enabling proactive diagnostics and resolution across package tracking workflows. Improved operational throughput by **20%** through strategic planning, **observability integration** (Prometheus, DataDog), and cross-functional team collaboration. Adopted across multiple geographies for global support enablement.
- Led GenAI initiatives like **AskGenie** and **SafeDrive** using **LangChain**, **Hugging Face**, and **transformer models**, enhancing safety and productivity across driver assistance and capital planning.
- **Leading scaling of Procurement Advisor**, enhancing supply chain operations through **automated ordering**, **robotics-based inventory management**, and **AI-powered virtual count predictions**. Applied **machine learning models** for **demand sensing** and **predictive analytics**, improving inventory accuracy and reducing manual interventions across world-wide **fulfillment centers**.
- Directed the **\$5.3B Naazir program**, building financial products for GESS to manage Amazon's global capital investments.
- Modernized services and API gateways to cloud-native architectures on AWS/Azure, embedding CI/CD, observability, and cost guardrails.

Roles & Responsibilities

- Led strategic planning and OKR-driven execution of enterprise programs.
- Facilitated Agile collaboration across engineering, product, UX, and business teams.
- Championed MVP development and innovation pilots.
- Implemented governance frameworks for risk, compliance, and data privacy.
- Drove continuous improvement using analytics and observability tools like Prometheus, New Relic, and DataDog.
- Owned architecture reviews and engineering excellence for tech-based services; mentored SDMs on scalable service patterns and SLOs.

Appendix B – Deloitte Consulting India Pvt Ltd

Deloitte Consulting India Pvt Ltd, Gurgaon, **Engineering Lead (Director of Engineering)**, Nov'15 –Mar'22

Key Achievements

- **Led 45-member engineering team**, delivering open-source and enterprise platforms across finance, logistics, and compliance. Improved sprint velocity by **30%** and reduced defect rates by **25%** via Agile transformation.
- **Transformed Scholastic's CMS and E-Commerce ecosystem**, streamlining editorial workflows and product distribution. Reduced time-to-market by **35%** through modular architecture and automation.
- **Spearheaded branchless banking rollout**, enabling kiosk and mobile-based financial services with AI avatars and facial recognition. Improved financial inclusion and cut operational overhead by **40%**.
- **Integrated AR/VR into smart manufacturing**, deploying immersive training and predictive diagnostics. Achieved **20% downtime reduction** and improved safety protocols.
- **Built ML-driven campaign automation product**, applying clustering and predictive scoring to increase targeting precision (**+30%**), reduce churn (**-12%**), and improve ROI (**2.5x**).

Roles & Responsibilities

- Defined engineering strategy aligned with OKRs, client roadmaps, and tech innovation.
- Led delivery using Scrum, Kanban, and tools like Jira, Confluence, Terraform, and Kubernetes.
- Fostered experimentation, inclusive hiring, and cross-pod collaboration across global teams.
- Instituted CI/CD pipelines for repositories (DevOps/AWS Code/GitHub), standardized code reviews, and enforced design patterns across engineering pods.

Appendix C – Shell Infotech India Pvt Ltd (@ Deloitte)

Shell Infotech India Pvt Ltd (@Deloitte, Hyderabad), **Project Manager**, Mar'15 – Nov'15

Key Achievements

- **Architected Salesforce Commerce Cloud platform** for B2B/B2C channels. Integrated headless APIs and personalization engines, lifting conversion rates by **25%**.
- Delivered Agile projects using **Scrum**, **Jira**, and **Microsoft Project Plan**.

- Led architecture design and performance reviews for frontend modernization.

Roles & Responsibilities

- Managed sprint planning, estimation, and release cycles.
- Directed cross-functional delivery and stakeholder reporting.

Appendix D – EMERIO (Malaysia) SDN BHD

EMERIO (Malaysia) SDN BHD, Malaysia, **Project Manager**, August'14 –Feb'15

Key Achievements

- Delivered process automation and analytics using SAS, Sitecore CMS, and .NET.
- Designed SQL Server models and UI components with HTML5, JavaScript, and CSS.

Roles & Responsibilities

- Led technical delivery and client reviews.
- Managed testing, documentation, and stakeholder alignment.

Appendix E – Royal Bank of Scotland Group

Royal Bank of Scotland Group, Gurgaon, **Team Lead (Specialism)**, Jul'09 – Jul '14

Key Achievements

- Supported **16 mission-critical applications** across global retail banking operations, including **mainframe-based transaction systems** handling scheduled batch processing, EFTs, and compliance workflows.
- Led a **10-member cross-functional engineering team** across geographies, improving **system uptime by 22%** and reducing **incident response time by 35%** through proactive monitoring and escalation protocols.

Roles & Responsibilities

- Managed bug fixes, enhancements, and vendor coordination.
- Oversaw disaster recovery and compliance operations.

Appendix F – Cincom Systems India Pvt Ltd

Cincom Systems India Pvt. Ltd., Gurgaon, **Senior Member Technical Staff**, Dec'07 – Jun'09

Key Achievements

- **Led migration of Ruby-based rule engine to .NET**, avoiding **\$1.2M in annual royalty fees** and improving system scalability and maintainability.
- **Architected a visualization and self-service configuration platform** for Cincom's Price-to-Quote (CPQ) product, enabling customers to dynamically define business rules and streamline complex quoting workflows.
- Delivered multiple **proof-of-concepts (POCs)** and conducted **unit testing** for core modules, accelerating product validation cycles and reducing defect rates.
- Conducted **R&D on emerging technologies**, contributing to product innovation and competitive differentiation in the enterprise software space.

Roles & Responsibilities

- Directed **end-to-end development cycles**, including sprint planning, implementation, and release readiness.
- Implemented **process improvements** across system design, **code reviews**, and **automated testing**, enhancing delivery velocity and code quality.
- Collaborated with **global engineering teams** to align product features with international client requirements and innovation roadmaps.
- Supported integration of IDE features into **Visual Studio**, improving developer experience and tooling adoption.

Appendix G – Kale Consultants Ltd

Kale Consultants Ltd., NOIDA, **Senior Programmer Analyst**, Nov'05 – Dec'07

Key Achievements

- **Developed airline booking and revenue management systems** for global clients including **BCD Travel** and **Air India**, supporting multi-region operations across **9 countries**.
- **Integrated Global Distribution Systems (GDS)** such as **Amadeus**, **Sabre**, and **Galileo**, enabling seamless connectivity between airline inventory, travel agents, and booking platforms.
- **Automated invoicing and revenue reporting workflows**, implementing region-wise and client-specific billing logic to improve accuracy and reduce manual reconciliation efforts.

- Conducted **integration testing, UAT**, and managed **release documentation**, ensuring smooth deployment and compliance with aviation data standards.

Roles & Responsibilities

- Led **requirement analysis, use case modelling**, and **functional design** for aviation and travel domain applications.
- Coded, tested, and deployed **scalable enterprise applications** using structured programming and modular architecture.
- Collaborated with cross-functional teams to align system capabilities with client-specific business rules.
